Total Return Bond Fund

E CLASS ACCUMULATION AND INCOME SHARES

Fund Description

The investment objective of the Fund is to seek to maximise total return, consistent with preservation of capital and prudent investment management.

The Total Return Bond Fund is a diverse portfolio of intermediate-term, investment grade securities, actively managed to maximise total return while minimising risk relative to the benchmark. The Fund invests primarily in US government, mortgage and corporate bonds, but may have tactical allocations to municipal, high yield and non-US markets.

This Fund is an actively managed portfolio of core bonds that employs prudent risk management and seeks to maximize total returns in all market conditions.

The Fund may use or invest in financial derivatives.

The Fund takes a long-term view and uses multiple concurrent strategies to limit the likelihood that any single strategy that falls out of favor would negate the positive returns from other strategies.

ABOUT THE BENCHMARK

Bloomberg U.S. Aggregate Index represents securities that are SECregistered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. It is not possible to invest directly in an unmanaged index.

Unless otherwise stated in the prospectus, the Fund is not managed against a particular benchmark or index, and any reference to a particular benchmark or index in this factsheet is made solely for risk or performance comparison purposes.

PIMCO

[⊕]PIMCO calculates a Fund's Estimated Yield to Maturity by averaging the yield to maturity of each security held in the Fund on a market weighted basis. PIMCO sources each security's yield to maturity from PIMCO's Portfolio Analytics database. When not available in PIMCO's Portfolio Analytics database, PIMCO sources the security's yield to maturity from Bloomberg. When not available in either database, PIMCO will assign a yield to maturity for that security from a PIMCO matrix based on prior data. The source data used in such circumstances is a static metric and PIMCO makes no representation as to the accuracy of the data for the purposes of calculating the Estimated Yield to Maturity. The Estimated Yield to Maturity is provided for illustrative purposes only and should not be relied upon as a primary basis for an investment decision and should not be interpreted as a guarantee or prediction of

future performance of the Fund or the likely returns of any investment. ¹Annualised Distribution Yield is as of last quarter ending 31/03/2024. The dividend distribution rate/yield is based on historical dividend rate/yield. The dividend amount or dividend rate/yield is not guaranteed. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund.

""Net Other Short Duration Instruments includes securities and other instruments (except instruments tied to emerging markets by country of risk) with an effective duration less than one year and rated investment grade or higher or, if unrated, determined by PIMCO to be of comparable quality, commingled liquidity funds, uninvested cash, interest receivables, net unsettled trades, broker money, short duration derivatives and derivatives offsets. With respect to certain categories of short duration securities, the Adviser reserves the discretion to require a minimum credit rating higher than investment grade for inclusion in this category. Derivatives Offsets includes offsets associated with investments in futures, swaps and other derivatives. Such offsets may be taken at the notional value of the derivative position.

Taken at the hotional value of the derivative position.
***Short duration emerging markets instruments includes an emerging market security or other instrument economically tied to an emerging market country by country of risk with an effective duration less than one year and rated investment grade or higher or if unrated, determined to be similar quality by PIMCO. Emerging Markets includes the value of short duration emerging markets instruments previously reported in another category.
^AWhere permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds.
Source: PIMCO, index provider for benchmark data.
PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security.

PIMCO duration calculation that adjusts the durations of credit securities to account for the potential that in the event of default investors will receive the recovery amount prior to the maturity of the security. Differences in the Fund's performance versus the index and related attribution information with respect to particular categories of securities or individual positions may be attributable, in part, to differences in the pricing methodologies used by the Fund and the index. Dividend is not guaranteed. Past distributions are not necessarily indicative of future trends, which may be lower. A positive distribution yield does not imply a positive return. Data does not include special cash dividends. Distribution payments of the Fund where applicable, may at the sole discretion of the Fund, be made out of either income and/ or capital of the Fund. In the case of Income II Shares, the Fund may at its discretion pay dividends out of capital as well as take into account the yield differential arising from share class currency hedging (which constitutes a distribution from capital). The management and other fees payable by the Income II Shares may also be charged to the capital of the Income II Shares, resulting in an increase in distributable income available for the payment of dividends and therefore, the lncome II Shares may effectively pay dividends out of capital. This may result in an immediate reduction of the Nucle II Shares. Please refer to www.pimco.com.sg for more information on income statistics. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security to a change in interest rates. The longer the duration of a fixed income security the higher its sensitivity to interest rates. Duration with 4 or 5 star ratings only. Other share classes ra

invested

Investment involves risk including possible loss of the principal amount invested. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. The value of shares of the Fund and the income accruing to them, if any, may fall or rise. Investment returns denominated in non-local currency may be exposed to exchange rate fluctuations. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Investors should consider the investment objectives, risks, charges and expenses carefully before investing. This and other information is contained in the Fund's Singapore Prospectus which is available and can be obtained from our website www.pimco.com.sg, a Fund distributor or the Singapore Representative. Prospective investors should read the Fund's Singapore Prospectus before deciding whether to subscribe for or purchase shares in any of the Funds. Investors may wish to seek advice from a financial adviser before making a commitment to invest and in the event you choose not to seek advice, you should consider whether the investment is suitable for you.
